

When tap view expands to reveal activity picker

the final segment in this doughnut chart will be how much is remaining.

If the user has exceeded the goals, the reminaing portion is not shown

Each segment is o day of the week.

The Color of the number could be Red/Yellow/Green depending on the percentage of weekly goal achieved

0-30% as red  
30%-80% as yellow  
80%-100%+ as green

The Sparkles or any other similar graphic will be shown if the user exceeds 100%

Each segment is clickable to update the graphic below.

Each day of the week shown in the legend below the chart is also clickable to update the graphic below.

This graphic shows the progress for the currently selected day of week in the chart above.

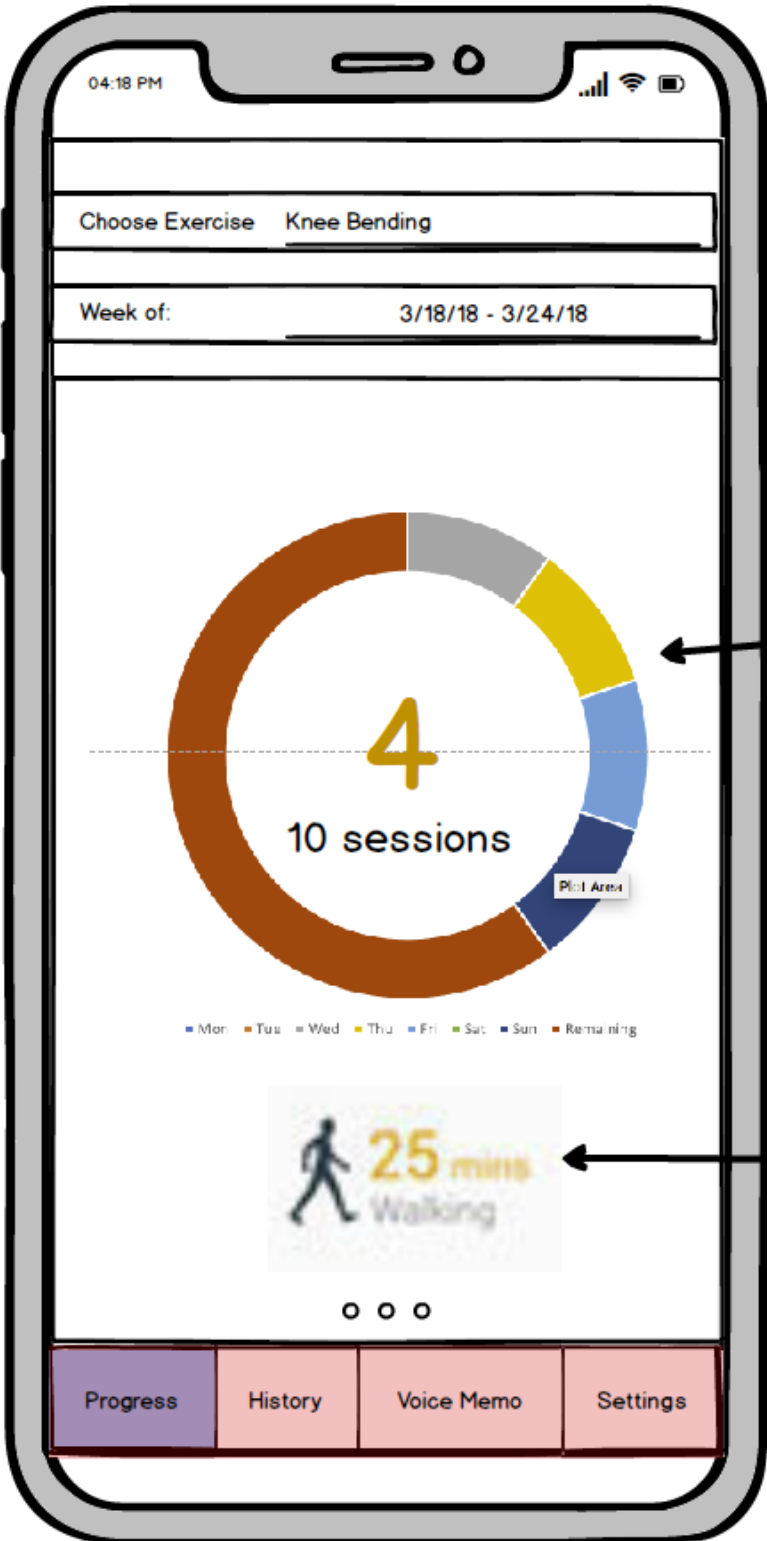

The "man" graphic and the name of the activity will change based on the exercise/activity being shown here

The text will show the value for the selected day.

Color of the text will be based on the color of the day in the chart above.

By default shows the most latest day of the week.

Swipe Left/Right to change between Activity view, and Exercise View

Similar Idea for both graphics in this view as above

We could show some meta-data about the sesion here

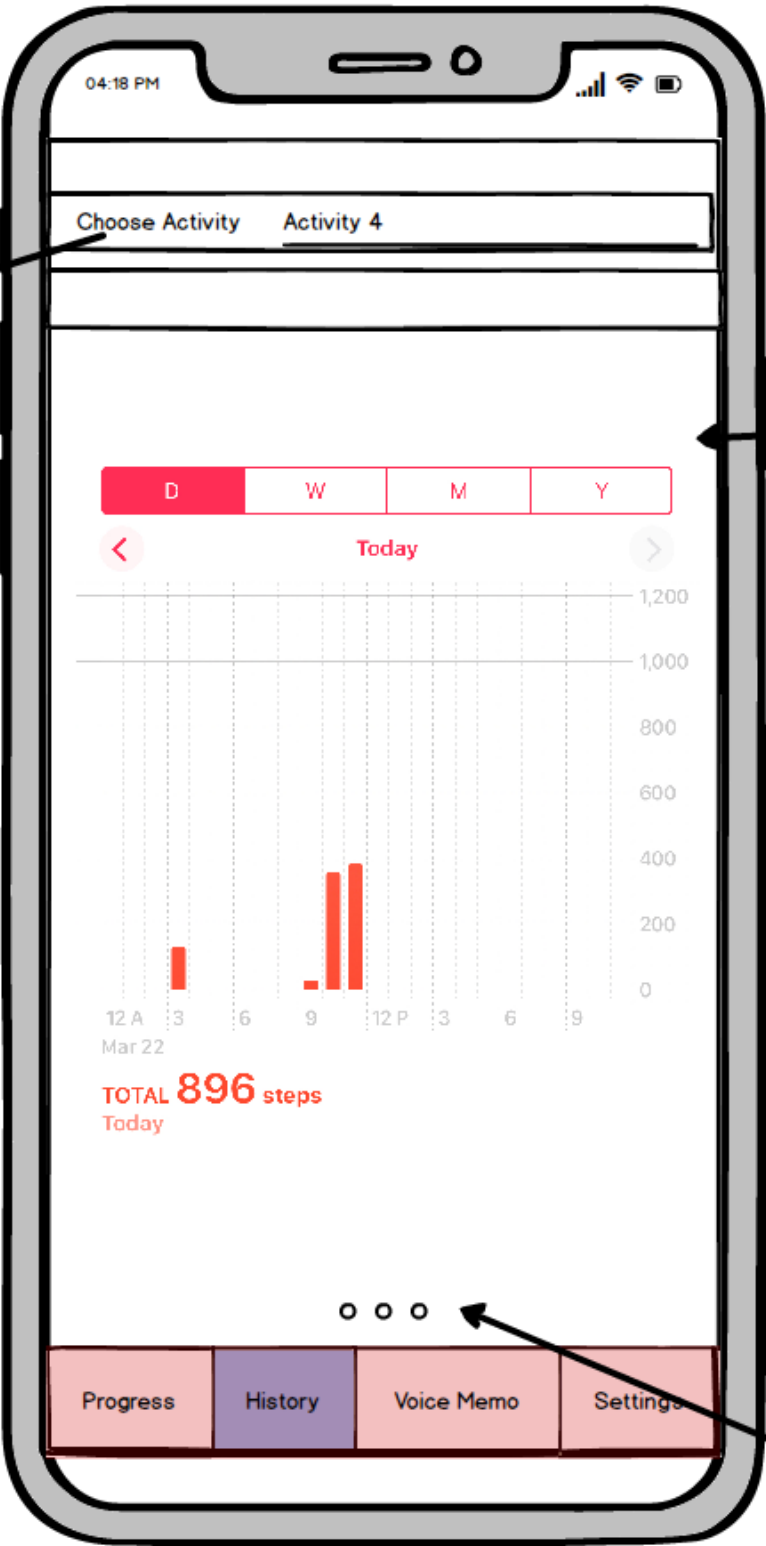

When tap view expands to reveal activity picker

Tap again to dismiss

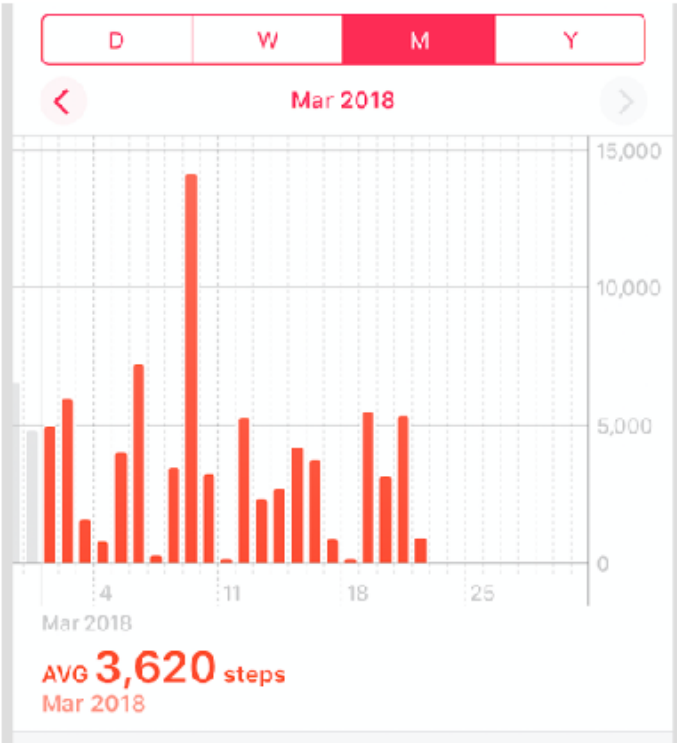

When tap view expands to reveal activity picker

Tap again to dismiss

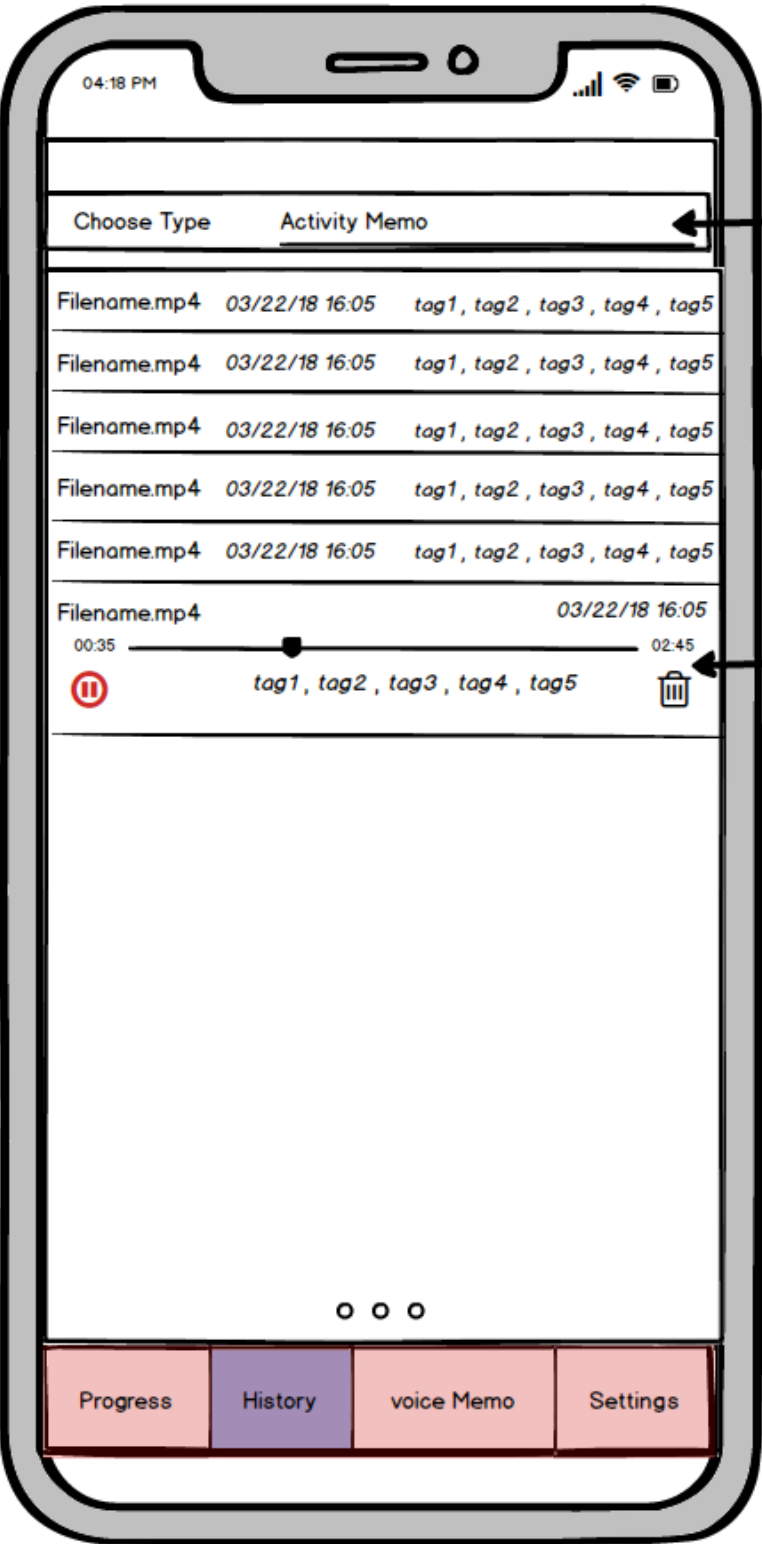

Either swipe on the graph or click on the small arrows to switch to a different day/week/month/year as the case may be.

for the week and month it could be a sliding window (meaning each week is a period of 7 days and not just a calendar week and similarly for month)

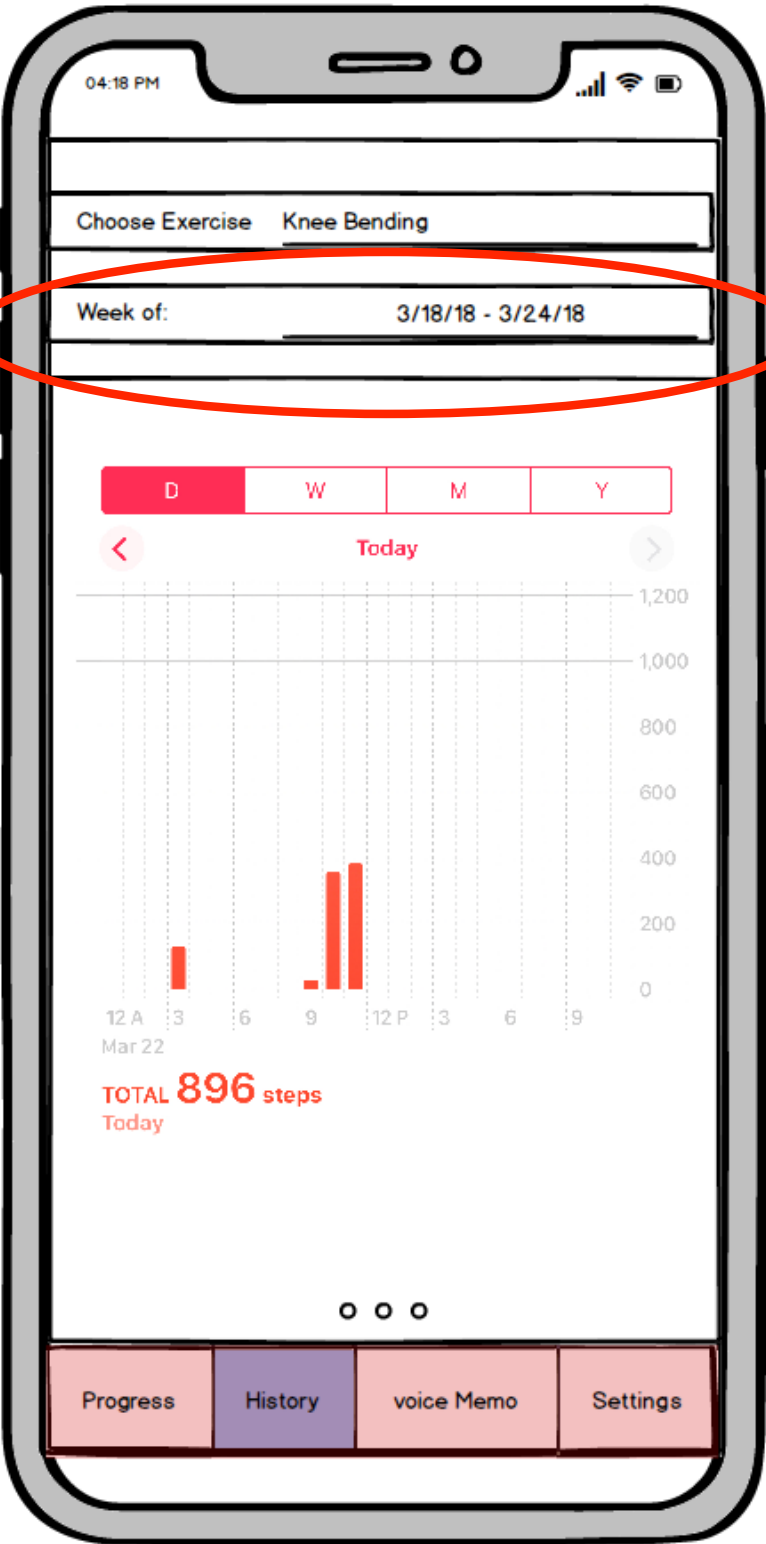

Swipe Left/Right to change between Activity, Exercise and Voice Recordings Views

Choose from Activity, Exercise or General

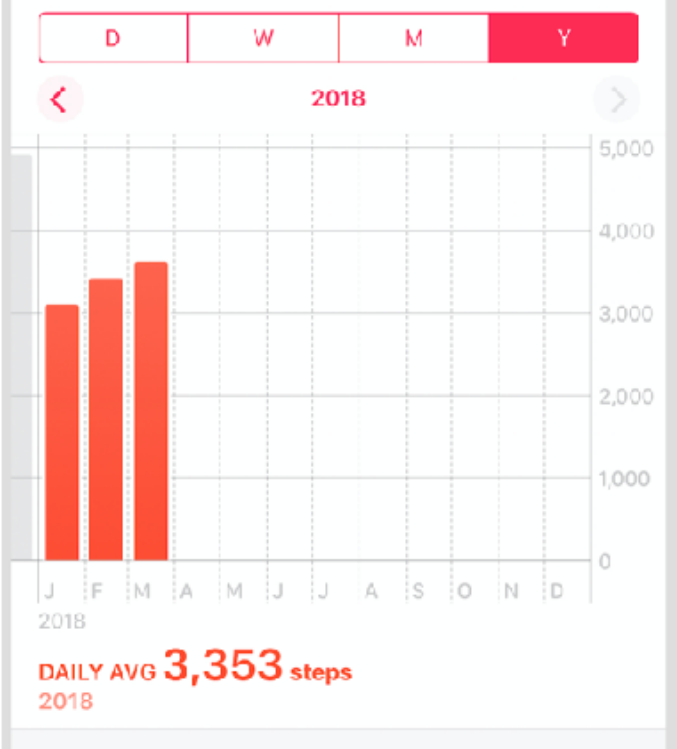

Each row collapses automatically when another is expanded.

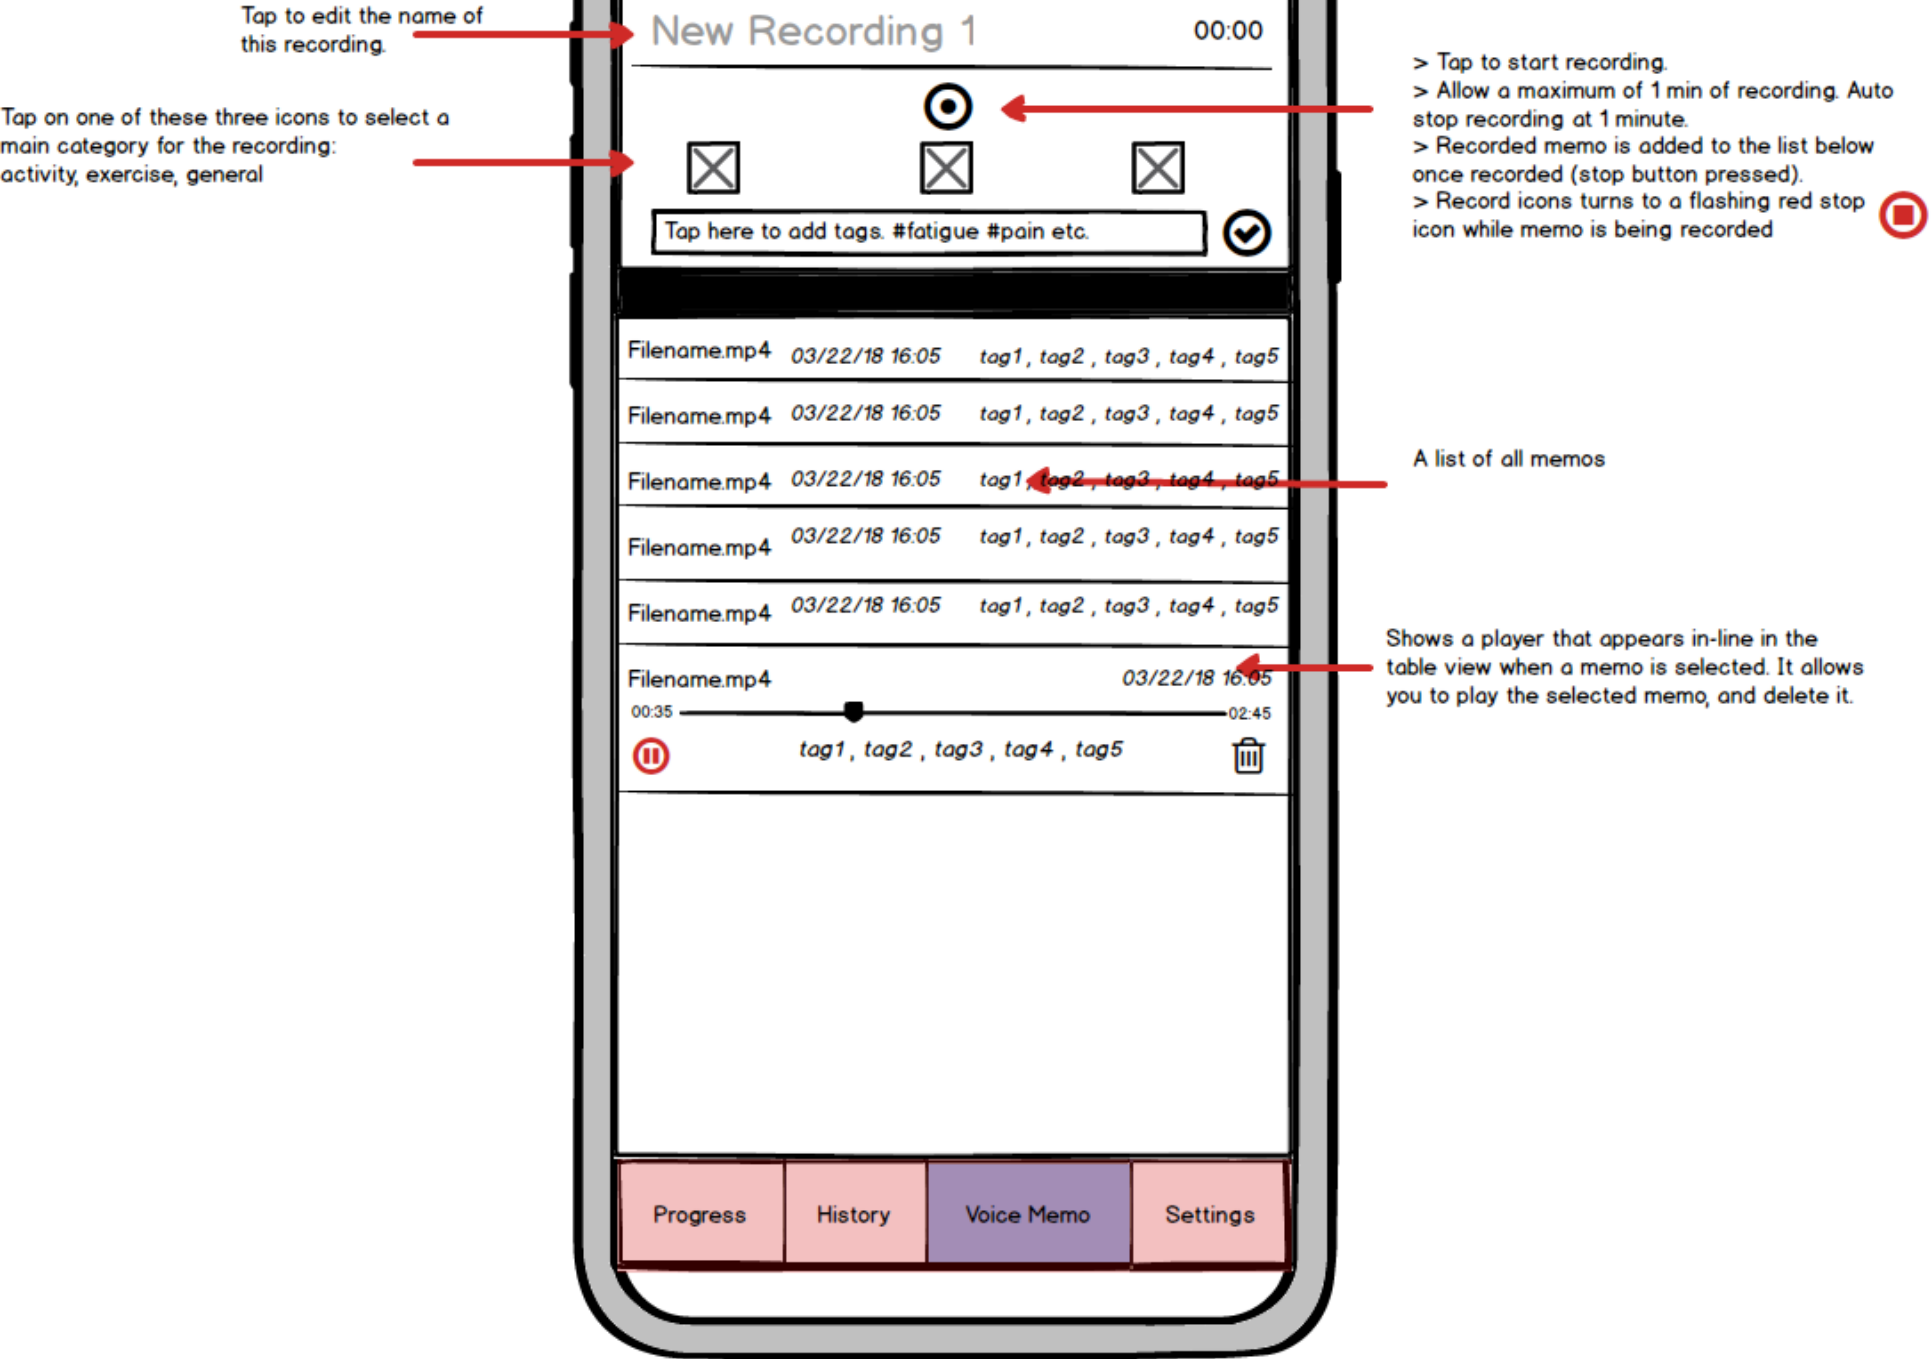

Similar view for history of exercises

On the right you can see various views for W/M/Y

We don't need this.. This was not removed by mistake

04:18 PM
